03/09/2022

Meeting started at: 10:00am

Present:

- **Raven Zucchelli**
- **Abigail Zucchelli**
- **Wasif Siddiqui**
- **Kumail Bukhari**
- **Aiden Nguyen**
- **Cedric Lee**
- **David Eddy**

Notes:

- Need github organization for admin privileges
  - May have to migrate some content
  - Need to authorize aws amplify for CI/CD pipeline
  - David and cedric will create this
    - Begin working on our own repo
    - Will fork out repo into the organization account later
- Github security policy
  - Start setup
- CI/CD
  - More than build and deployment
  - Need quality checks
  - How far down CI/CD will we go?
    - Can have webhooks
      - Commit will post to url's provided
    - Protect matching branches
      - 2 approvals, automatically merge is an option
    - Seems like we only wanna build and deploy
      - This is fine, ask if we want more
- Proposal
  - Front end and middle resolved with nextjs
  - Maybe make a static webpage, talk to database, something trivial as a short term milestone
- By next wednesday
  - Basic skeleton of project
    - Make the front end form in a basic way
    - Have the radio buttons
    - Pull employee id from database
  - Pull data from database
  - Get pieces talking to each other
  - No integration to blockchain just yet

Meeting end: 10:37 AM CST
