03/04/2022

One-on-One meeting with David about Blockchain - Started: 3:30pm

Present:
- **David Eddy**
- **Raven Zucchelli**

Notes:
- Demonstrated Error with Postman
  - Solution: Download Postman onto laptop
- How Project will work with Blockchain code
  - Utilizing Post and Get implemented into Project code:
    - Post information or parameters to blockchain
    - Get message from blockchain
- Only accepts an employer version with no space for employee address or score
  - Two methods for resolve this: (discuss with team)
    - Expand code to have those two parameters
    - Pass JSON stringify object with employee address and score
- Next Step:
  - Set up docker container - priority
  - Eventually integrate with AWS
  - Potentially if desired change naming convention

One-on-One meeting with David about Blockchain - Ended: 3:58pm

Meeting started at: 4:00pm

Present:

- **Raven Zucchelli**
- **Abigail Zucchelli**
- **Wasif Siddiqui**
- **Kumail Bukhari**
- **Aiden Nguyen**
- **David Eddy**

Notes:

- Waiting on Cedric Lee
  - React or NextJS
    - David doesn't mind NextJS
- Cedric Lee did not attend, meeting ended
- Separate repos for front end, backend, middle tier
- Ask cedric about NextJS
  - With NextJS
    - ONE repo
  - Without
    - Multiple
    - Avoids merge conflicts later on
- Clarified further on how the Database end will look like
- GitHub for PrivateBlockChain was created and invites were sent

Meeting end: 4:37 PM CST
