02/16/2022

Meeting Start: 10:05 AM CST

Present:

- **Raven Zucchelli**
- **Abigail Zucchelli**
- **Wasif Siddiqui**
- **Kumail Bukhari**
- **Aiden Nguyen**
- **Cedric Lee**

Notes:

- Sharing screen to show fields
    - Scope is defined to the employer
    - How will we present the data (for the mock up)
        - No free form text
        - Only Options: radio buttons, drop downs, free form
        - Unique identifier
            - Free form text or database calls
        - Try to stay away from free form text to avoid the permutations
        - No comments yet because that will be complicated for this project
    - For general mockups do we need the registration screen along with the referral form? (raven)
        - We should not have to register the employee since they are already registered
    - If No in "Employee registered" should not be in the referral form
        - Employer should not be registering employee
    - In database we create
        - Employer and employee unique identifiers
    - How does lambda know that we have the right/valid employee or employer?
        - We can use dummy data for employee and employer
        - Employer should receive the link and the form should pull their info automatically from the database
        - This will help with how we are building database and lambda functions
    - By Friday
        - Mockups

Meeting End: 10:33 AM CST

Next Meeting: 02/18/2022 @ 4:00 PM CST
